91/100 – Jun 2026

Uji level | Aplikasi Web E- Commerce Sederhana

79/100 – Jun 2025

PORTOFOLIO PROJECT – Narendra Bintang

Second Style

Second Style is a simple e-commerce website built using HTML, CSS, and JavaScript, with FakeStoreAPI for fetching product data dynamically. The project features product listings, product details, category filtering, and a responsive user interface, serving as my first step in learning front-end web development.

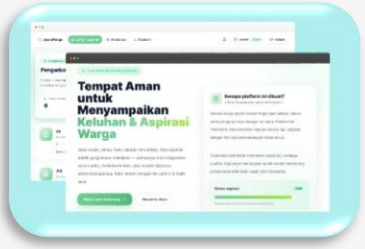

See Project ->

Digital Library

Digital Library is a web-based library management system built using React and JavaScript. The application features user authentication, book catalog management, borrowing requests, protected routes, and a responsive interface to provide an efficient digital library experience.

See Project ->

SuaraWarga System

Suara Warga is a community complaint management system built using Next.js, React, React Native, and MySQL. The platform enables users to submit and track reports, while Admins manage and verify complaints, and Super Admins oversee users and the overall system through a
